

Does the flu virus attend class too often?

How do you lock MRSA out of your locker rooms?

**TOUGH JOBS
DEMAND SMART
SOLUTIONS**

Cleaning products that
excel in schools

Is your No. 1 restroom problem
the smell of No. 1?

Are greasy cafeteria floors
giving you the slip?

SMART *and* TOUGH

A HIGH DEGREE OF CLEAN

We understand that diluted chemicals are fine for many jobs, but they can't do it all. Tough jobs like eliminating germs, urine stains and floor grease need the right chemicals to get the job done right the first time. Clorox® ready-to-use products clean extremely efficiently (no more arduous scrubbing or using excess product), saving you time and money. In addition, every Clorox® product is backed by the most advanced R&D and a century of knowledge and experience.

- CAFETERIAS 4
- LOCKER ROOMS 5

CLASSROOMS

Germs have perfect attendance

Desks, chairs, tables, door handles — germs can be anywhere, which can be especially problematic during a flu outbreak. Also, classrooms rarely get disinfected.

EXPEL GERMS QUICKLY

All Different Kinds, All Spread Fast

Norovirus, Rhinovirus, Rotavirus and Influenza A (common causes of stomach illness, colds and the flu) can quickly spread from surfaces to students and cause absenteeism. Some germs can live on surfaces for days or weeks, so disinfecting classrooms can't be neglected — although desks may be cleaned only 1-2 times a year in some schools.

Clorox® Hydrogen Peroxide Disinfecting Cleaner

It kills high-concern germs like MRSA, Norovirus, Rhinovirus and Rotavirus in 1 minute, and it kills Influenza A in 30 seconds — all in one easy step. This quickly cuts down the spread of infection-causing germs. The active ingredient, hydrogen peroxide, breaks down into water and oxygen, and the formula has no harsh fumes, odor or Volatile Organic Compounds (VOCs).

RESTROOMS

The hardest-to-clean rooms

The battle of the restrooms. They get judged the most on cleanliness, but they're often the dirtiest locations on campus. They're a pain point considering that you have to solve problems as diverse as urine odors, germs and soap scum.

URINE HAS TO GO

Urine Odor & Stains

Urine is one of the toughest stains to clean and hardest odors to remove, especially on porous grout. When uric acid crystals are left behind, moisture will reactivate them, and the smell will return.

Clorox® Urine Remover

It eliminates odor-causing uric acid crystals and stains on both hard and soft surfaces, particularly on tough-to-clean surfaces like grout. You can breathe easier.

QUELL SMELLS

Germs & Odors

Illness-causing germs can spread on almost any hard surface — particularly high-touch areas. Germs and mold can also emit lingering offensive odors. So it's essential to clean and disinfect surfaces

Clorox® Disinfecting Spray

It disinfects — killing 64 pathogens — and it deodorizes. It also kills mold, preventing it from growing and spreading.

SCUM ON THE RUN

Soap Scum & Germs

Germs, as we know, can be all over bathroom surfaces. Soap scum is difficult and time-consuming to remove.

Clorox® Hydrogen Peroxide Disinfecting Cleaner

It removes soap scum, but that's only the beginning. In fact, it kills 37 pathogens — including MRSA, CA MRSA, Norovirus, Rhinovirus, Rotavirus and Influenza, without harsh chemical fumes.

CAFETERIAS
Cleaning grease used
to require lots of
elbow grease

Whether on appliances, floors or other surfaces, grease is hard to remove. What's required is a fast and easy method. Which is exactly what we deliver.

GREASE WILL CEASE

Baked-On Grease

Grease finds its way onto lots of different surfaces. When baked on, it can be particularly difficult and time-consuming to remove.

Clorox® Professional Multi-Purpose Cleaner & Degreaser Spray

It quickly and easily dissolves tough baked-on grease without residue or streaks. Unlike other degreasers on the market today, it's free of the chemicals butyl cellosolve and caustic, so it doesn't emit harsh fumes during use.

Greasy Floors

Grease accumulates in quarry tile and grout, which leads to slipping. In fact, slips and falls are the No. 1 accident in the food service industry.¹

Clorox® Professional Floor Cleaner & Degreaser Concentrate

It lifts grease out of tile and grout, thereby improving safety. Like our Multi-Purpose Degreaser, our Floor Concentrate is also free of harsh chemicals like butyl cellosolve and caustic.

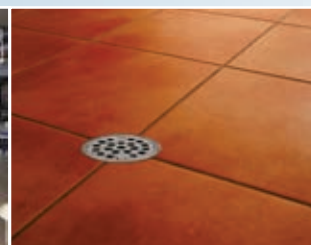

GERMS AREN'T ON THE MENU

Germes & Other Pathogens

In addition to grease, germs and other pathogens are found on many surfaces throughout kitchens.

Clorox® Clean-Up® Disinfectant Cleaner with Bleach

It cleans and disinfects in one labor-saving step. It's particularly effective at cleaning reinforced fiberglass plastic, the white back-splash material found in many commercial kitchen areas. It also works well on stainless steel and Formica² tabletops.

2. Formica is a trademark of the Diller Corporation.

LOCKER ROOMS

Where a team of tough problems gathers

MRSA, other pathogens, mold and urine stains, and odors all give your locker rooms a workout.

MRSA — NO MERCY

MRSA & Other Pathogens

Disease-causing pathogens can destroy a student team's health and success. So surfaces must be properly cleaned and disinfected to stop the spread of infection-causing germs.

Clorox® Hydrogen Peroxide Disinfecting Cleaner

It kills 13 antibiotic-resistant strains and organisms, including MRSA and CA-MRSA in 1 minute. In all, it eliminates 37 pathogens.

URINE PROBLEMS RELIEVED

Urine Stains & Odors

Urine is one of the toughest stains to remove from porous surfaces surrounding toilets, especially when it's dry. Ordinary cleaners may appear to solve the problem, but they don't remove uric acid crystals. Moisture will reactivate the crystals, and the smell will return.

Clorox® Urine Remover

It eliminates urine odor and stains as well as uric acid crystals on both hard and soft surfaces.

MOLD & GERMS — LOCKED OUT

Germs & Odor

Mold and mildew are hard to remove and can affect people with allergies. Also germs and pathogens spread easily throughout locker rooms. What's required is effective cleaning and disinfecting.

Clorox® Disinfecting Spray

It cleans, disinfects, deodorizes and even kills MRSA and CA MRSA in 3 minutes. In fact, it kills 64 pathogens while eliminating mold.

PRODUCT INFORMATION

**Clorox Commercial Solutions®
Clorox® Hydrogen Peroxide
Disinfecting Cleaner**
case UPC 30832 9/32 oz. Spray
case UPC 30833 4/128 oz. Refill

**Clorox Commercial Solutions®
Clorox® Hydrogen Peroxide
Disinfecting Wipes**
case UPC 30830 6/110 ct.

**Clorox Commercial Solutions®
Clorox® Hydrogen Peroxide
Disinfecting Wipes**
case UPC 30831 2/800 ct.

**Clorox Commercial Solutions®
Clorox® Urine Remover**
case UPC 31036 9/32 oz.

**Clorox Commercial Solutions®
Clorox® Urine Remover
Spray Jug**
case UPC 31037 4/128 oz.
